GIPS Newsletter: August 2007

GIPS 2010 Questionnaire
As stated in the 2005 GIPS® standards, the Standards will be reviewed every five years to ensure that they remain current. We have designed a questionnaire to collect your inputs and suggestions on topics that should be considered as part of the next review in 2010. Your active participation in this important initiative will directly impact the future development of the GIPS standards. The deadline to participate has been extended, so please take a few moments and submit your comments no later than August 31. The results of this questionnaire will be included in the materials provided to the Executive Committee for their consideration. Please submit your comments at our website.

GIPS® Standards Conferences and Workshops
The GIPS Standards Annual Conference is scheduled for 27-28 September 2007 in Chicago, Illinois. Space is limited, so register now. More information and registration details may be found online.

A GIPS Standards Interactive Workshop directly precedes the annual conference and is scheduled for 26 September 2007 in Chicago. The workshop will help participants who have relatively little experience with the GIPS standards to master the components, including composite construction, performance calculation, and creating a compliant presentation. Find complete details on our website.

The Q&As from the 2006 GIPS Standards Annual Conference are now available online.
