2010 GIPS Annual Conference and Workshop – There is still space left!
Register today for the GIPS Standards Annual Conference scheduled for 29-30 September 2010 in San Francisco. Last year’s conference sold out and space is rapidly filling up. This year’s conference will cover key topics in the performance measurement industry as well as key elements of the 2010 edition of the GIPS standards.

A GIPS Standards Interactive Workshop precedes the annual conference and is scheduled for 28 September 2010 in San Francisco. The workshop will help participants master the requirements of the GIPS standards, including composite construction, performance calculation, and the creation of a compliant presentation. In order to help you get prepared for 2011, this workshop will specifically include interactive discussion about the 2010 edition of the GIPS standards. Learn how your firm might be impacted and what the changes might mean for compliance.

Three Exposure Drafts Open for Comment
Revised Guidance Statements addressing Real Estate, Private Equity, and Verification have been released for public comment. Revisions to these Guidance Statements reflect changes based on the 2010 edition of the GIPS standards as well as additional interpretation and clarifications. The public comment period closes on 25 November 2010. Please visit the GIPS standards website for more information.

The remaining Guidance Statements are also being revised to reflect the changes in the 2010 edition of the GIPS standards. Because these Guidance Statements are only being revised to reflect the changes to the GIPS standards and do not include new guidance or material changes to the existing guidance, they will not be released for comment. These Guidance Statements will be published pending their approval at the GIPS Executive Committee meeting on 28 September.

Staying Current
Stay up to date by signing up for the GIPS Newsletter and the GIPS RSS feed, and by following us on Twitter. Please visit the GIPS website for additional information and resources, including podcasts from the last year’s GIPS Standards Annual Conference in San Francisco.
